LONG ISLAND UTILITY CONTRACTOR AWARDED MULTI-YEAR COATING CONTRACT

SMITHTOWN, NEW YORK (JANUARY 31, 2017)

CERTA-COTE, Inc. a leading Northeast utility contractor for gas pipe corrosion applications, has been awarded a multi-year contract from CONSOLIDATED EDISON (CE). As one of the largest investor-owned US energy companies, CE has unique and stringent selection criteria when choosing contract partners.

“CERTA-COTE is proud that Con Edison has placed its confidence in our company naming CERTA- COTE as an approved vendor,” states Glenn Mazzella, CERTA-COTE President. CERTA-COTE began working on New York City Con Edison gas projects in 2009. Eight years later, CERTA-COTE has successfully completed more than 250 CE gas construction assignments.

Mazzella goes on to say, “Forward thinking utility companies like CON EDISON choose CERTA-COTE because they seek like-minded firms that take pride in a “safety first” philosophy. CERTA-COTE designed and engineered the “*Emission Control Kettle*” (ECK), which has revolutionized the tar industry.”

In addition to the CON EDISON long term contract, CERTA-COTE was also recently awarded a 5-year contract by PERSICO...RIGGS DISTLER to provide gas corrosion protection throughout Westchester County.
